## Red Gully Processing Facility resumes operations

Oil and gas producer and explorer Empire Oil and Gas advises that it has resumed production at its Red Gully Processing Facility. The facility had been temporarily shut-in when an external cold vent was affected by a lightning strike on Saturday afternoon.

An independent engineering team assessed the cold vent today (Monday) and confirmed the plant could be safely restarted.

Empire Oil and Gas Chief Executive Officer Ken Aitken said the response from Empire's employees, its service providers and the local fire brigade had been extremely professional, enabling Empire to quickly confine the issue on Saturday and safely resume operations today.

### About Empire Oil & Gas

Empire Oil & Gas NL ('Empire' or the 'Company') is an onshore conventional gas and condensate producer and explorer listed on the Australian Securities Exchange (ASX: EGO) with key assets in the Perth Basin in Western Australia. The Company's producing assets at Red Gully are less than 150kms from the city of Perth where there is a strong gas market. Since commencing operations in 2013, the 100% owned Red Gully Processing Facility has produced and delivered over 5,000 Terajoules (TJ) of gas. Gas produced to date has been contracted to Alcoa and delivered through the Dampier to Bunbury Natural Gas Pipeline (DBNGP), which lies next to the Processing Facility. Condensate produced is transported via road to BP.

EGO is the holder of the largest net acreage in the highly prospective Perth Basin with its production licenses and permits covering more than 10,000km<sup>2</sup>, representing 48% of the currently granted acreage in the Perth Basin. Close to pipeline infrastructure and with rapid commercialisation opportunities, the Company has significant exploration potential in an underexplored, proven petroleum system.

Empire's vision is to sustainably grow the business into a mid-tier exploration and production company. Empire's strategy is to be the Perth Basin operator of choice, safely supplying WA domestic gas by growing the Red Gully production hub, delivering reserves and production growth by drilling material quality exploration prospects in the high profit margin onshore Perth Basin, enabling Empire to attract quality farm-in partners to assist in accelerating growth plans.
